

*** POTENT - NON-STEROIDAL TESTOSTERONE BOOSTER - POWERFUL ***

TestX6™ is the first hybrid non-steroidal Testosterone Booster on the market combining the clinically proven research of Testofen® and ZMA® using MultiSeal™ Technology to lock in potency and extend shelf life. *

Approximately 98% of the testosterone in the bloodstream circulates bound to Sex-Hormone Binding Globulin (SHBG) and the rest to Serum Albumin. In healthy males, a meager 2% of testosterone is considered to be biologically active capable of binding to androgen receptors. SHBG significantly inhibits the function of testosterone. *

By freeing up existing endogenous clusters of BOUND testosterone and fortifying certain mineral levels (Zinc, Magnesium and B6), a substantial elevation in FREE testosterone levels occurs. As a result, the user experiences enhanced IGF-1 levels, dramatically increased bio-available "FREE" testosterone, incinerated adipose (FAT) tissue, increased strength, added lean muscle mass, improved sleep, reduced estrogen levels, dramatically improved protein synthesis, overall shift in body composition, and a much desired *Elevated Sex Drive*. *
